

FCC: To Whom it May Concern:

We benefit from XM Satellite Radio and its traffic and weather channels. We travel often to Phoenix, AZ and it gives us the advantage of having traffic information as well as weather. Also, we have this advantage when traveling anywhere within the United States.

Satellite radio provides variety and quality that are not available elsewhere, especially for us as we live in an area that is 120 to 300 miles from a city and do not have reception for many radio stations. Even when we are in the area of Phoenix or larger cities we always listen to XM Satellite Radio, as nothing else compares.

We pay for the service of XM Satellite Radio and it should not be up to the National Association of Broadcasters to dictate what we are permitted to hear. We respectfully urge the FCC to reject the NAB's petition 04-160 and to support XM's ability to provide the kind of programming that we demand and deserve.
